Native Russian and Belarusian speaker.

Education

IT-courses “Rolling Scopes School”

IT-courses “Adukar”

Minsk Innovation University «Psychology»

Belarusian State University «Biology»

Lyceum of Belarusian State University «Chemical/Biological»

Objectives

I want to start a career as a Front-end at a creative company to become a part of the development team and advance to Senior Full-stack with the opportunity to become a Team Lead in the future. I’m always evolving and adding new programming languages, frameworks, and tools to my tech stack.

Work experience

HIGHLIFE Ltd. - CEO
www.fmx.by

At that time it was a great conception to start a new business from our hobbies. At this site, you can see most of my ideas and solutions, design conception, logo drawing, photo processing. I have written most of the articles and descriptions, news. We were made events and worked with the media (We were the first in Belarus who organized the largest musician and sports festival at the Airport Minsk-1 - "Inspiration by speed 1-2"). Eventually opened a store, where I worked with suppliers. I was working with CMS Joomla, where I connected modules and fixed bugs in code. At that time I just started to dive into the javascript world. Currently, we are suspending activities, but work on the project will continue soon...
In recent years, I studied at the Rolling Scopes School and worked as a freelancer. Layout landing pages and worked with different CMS.

About me

I'm always loved to create complicated things with many details. I'm having graphic design skills and an understanding of digital aesthetics. I love the design, and of course, love programming. Persevering and multitasking, with analytical thinking and an engineering mindset. I have a critical reflection on my past self-coding mistakes and can self-taught from them. I like to educate myself, open to cutting-edge technologies and challenges. I can easily go through training under the supervision of an experienced mentor and show a quality result, write complex clean code and maintain it. Perfect team player with a versatile personality and a sense of humor.

Thank you for your time *Anton Vasilyuk*
